

EDUCATION

B.S. in Software Engineering | *Florida Gulf Coast University*

Spring 2026

- GPA: 3.81 | Dean's List x4 | President's List x2
- Entrepreneurship Minor | Honors First-Generation College Student

EXPERIENCE

IoT Software Engineer | *Applied Physics Laboratories*

Spring 2026 – Present

- Early engineering team member at a growing IoT startup developing embedded GPS-based devices
- Architected and developed a mobile app using React Native to manage IoT devices via BLE
- Implemented embedded firmware in C for a Bluetooth Low Energy controller

Backend Engineer Intern | *BoomBox*

Summer 2024 – Summer 2025

- Collaborated with a student-founded startup building a community-driven music social app
- Built 3+ RESTful API endpoints using JavaScript to support new features and enhance experience
- Optimized PostgreSQL with Prisma database structure, improving query performance and reliability

PROJECTS

IMPOSTURE | *ShellHacks 2025*

Fall 2025

- Developed a real-time desktop app in a team of 4 that monitors posture and provides recommendations
- Built computer vision pipeline utilizing Google MediaPipe and YOLOv11 for pose and phone detection
- Implemented Google ADK to create 3 agents that analyze posture, detect phones, and monitor noise
- Integrated Google Cloud Logging for real-time data streaming recording over 38,000 rows of user data
- Achieved Top 11 overall and 2nd place in Google Cloud ADK Featured Challenge among 1400+

RoundReady

Fall 2023 - Present

- Designed and built a mobile app to streamline emergency procedures for on-call resident assistants
- Engineered backend systems and workflows utilizing JavaScript that reduced incident response times
- Founded RoundReady LLC and secured \$3,000 through FGCU's Runway Program for development

CAMPUS AND COMMUNITY INVOLVEMENT

2nd Place OneEthos Hacker | *KnightHacks 2025*

Fall 2025

- Built full-stack website in 36 hours using React, Node.js/Express, Python, Docker, and Gemini AI

Pitch Winner | *Runway Program*

Spring 2025

- Participated in a semester-long startup incubator program to develop and pitch RoundReady

Lead Hackathon Coordinator | *CSSEC EagleHacks*

Spring 2024 – Present

- Led planning and execution of three hackathons with 180+ hackers, 6+ sponsors, and \$30K+ raised
- Redesigned event format using feedback, increasing reach and scaling operations for future events
- Partnering with national organization INIT to host a public hackathon improving event operations

Learning Hub Fellow & Ambassador | *U.A. Whitaker College of Engineering*

Fall 2023 – Fall 2025

- Tutored 450+ hours across 4 core courses, helping students in Python, C++, algorithms, and OOP

President | *Computer Science & Software Engineering Club*

Fall 2022 – Present

- Scaled weekly club meeting attendance from 10 to 45 members, leading a 10-person board
- Coordinated guest speakers from Microsoft, Arthrex, Kingland, Hertz, and Eightpoint

Member | *Society of Hispanic Professional Engineers*

Fall 2022 – Present

- Attended national and regional conferences focused on technical workshops and networking
